ABC TECHNOLOGIES ? INTERNAL AUDIT REPORT

Reference: AUD-2026-002
Audit Period: Q1 2026 / April 2026
Report Date: 10 April 2026
Prepared by: Internal Audit Team
Reviewed by: Chief Information Security Officer
Classification: Confidential ? Internal Use Only

This report presents findings from the Q1 2026 internal audit of ABC Technologies.
Prior audit: AUD-2026-001 (January 2026).

1. AUDIT SCOPE AND METHODOLOGY

1.1 Scope
Controls reviewed in this cycle:
- Control SEC-014: Employee Access Reviews (IT Operations)
- Control SEC-013: Vulnerability Management (IT Operations)
- Control SEC-009: Business Continuity Planning (IT Operations)
- Control SEC-010: Supplier Security Assessment (Procurement)

1.2 Methodology
- Document review and evidence collection
- Interviews with IT Operations Manager and Procurement Manager
- Technical inspection: patch status reports, BCP test records

Fieldwork: 01 April 2026 to 10 April 2026.

2. EXECUTIVE SUMMARY

Three findings identified. One High, two Medium severity.

FINDING SUMMARY TABLE

ID	Control	Title	Severity	Dept
F1	SEC-014	Employee Access Reviews ? Recurring	High	IT Operations
F2	SEC-013	Vulnerability Scan Overdue	Medium	IT Operations
F3	SEC-010	Supplier Assessments Incomplete	Medium	Procurement

Finding F1 is a recurrence of the same gap identified in AUD-2026-001 (January 2026). The partial remediation from that cycle was insufficient: the Q1 2026 review was initiated but approvals remain unsigned.

This is the second consecutive audit cycle with an unresolved access review gap for IT Operations (Control SEC-014). Escalation to senior management is recommended if not resolved before the next review window.

3. DETAILED FINDINGS

FINDING F1: Employee Access Reviews ? Recurring Approval Failure
Control: SEC-014 Employee Access Reviews
Department: IT Operations
Severity: High
Status: Open
Report Date: 10 April 2026

DESCRIPTION
This finding is a recurrence of AUD-2026-001 / F1 (January 2026). Although the IT Operations Manager initiated the Q1 2026 access review in February 2026, the following gaps remain as of 10 April 2026:

1. The access review for privileged accounts is 60% complete. Approval records (signed access review) are missing for 5 of 8 privileged accounts.
2. One former employee (departed February 2026) still has active access to two production systems.
3. HR sign-off confirming the leaver was processed is absent.

Evidence submitted (Access_Review_Feb2026) is incomplete ? no IT Operations Manager approval signature is present on the document.

EVIDENCE REQUIRED (Control SEC-014)
Signed access review record with approval from IT Operations Manager and HR, covering all privileged accounts and application access lists.

RECOMMENDATION
1. Obtain IT Operations Manager signature on the February 2026 review.
2. Complete the remaining 40% of privileged account reviews immediately.
3. Revoke access for the February 2026 leaver without further delay.
4. Formally escalate to CISO given this is a second-cycle recurrence.

TARGET REMEDIATION DATE: 24 April 2026
OWNER: IT Operations Manager

3. DETAILED FINDINGS (continued)

FINDING F2: Vulnerability Scan Overdue
Control: SEC-013 Vulnerability Management
Department: IT Operations
Severity: Medium
Status: Open
Report Date: 10 April 2026

DESCRIPTION
The monthly vulnerability scan for March 2026 was not performed.
The last scan on record is dated 28 February 2026. Per Control SEC-013,
scans must be performed monthly and results reviewed within 5 business days.

RECOMMENDATION
Perform the overdue March scan immediately and schedule April scan.
Assign a named owner for the monthly vulnerability scan process.

TARGET REMEDIATION DATE: 17 April 2026
OWNER: IT Operations Manager

FINDING F3: Supplier Security Assessments Incomplete
Control: SEC-010 Supplier Security Assessment
Department: Procurement
Severity: Medium
Status: Open
Report Date: 10 April 2026

DESCRIPTION
4 of 7 active suppliers have not had a security assessment completed
in the past 12 months. Control SEC-010 requires annual assessments.
Assessments for suppliers onboarded before January 2025 are overdue.

RECOMMENDATION
Complete overdue supplier assessments and implement annual review reminders.

TARGET REMEDIATION DATE: 30 April 2026
OWNER: Procurement Manager
